Serhii Khomenko

SENIOR SOFTWARE ENGINEER · FULL-STACK (FRONTEND-HEAVY) · REACT / NODE.JS

Lviv, Ukraine · Remote (EMEA, GMT+2 / overlaps CET) serhii.khomenko.verified@gmail.com linkedin.com/in/serhiikhomenko
t.me/KhSerhii Portfolio: serhii-khomenko.vercel.app

Product-minded Senior Software Engineer with 7+ years building React, Next.js, and TypeScript products, plus practical Node.js backend experience: REST APIs, business logic, MongoDB, GraphQL, and real-time Socket.IO flows. Built the Calyptus front end from zero and worked on the Node.js API behind it; three years on it serves 100k+ users and 100+ companies. Strong focus on AI/LLM features in production: candidate matching, smart search, profile parsing, and streaming responses. Experienced in AI talent, fintech, Web3, and eCommerce with distributed EU and US teams; open to full-time or B2B contract.

WORK EXPERIENCE

Calyptus · London, UK (Remote)

Sep 2023 - Present

Software Engineer · AI-powered talent platform

Stack: React, TypeScript, Node.js, REST APIs, Socket.IO, OpenAI API, shadcn/Radix, Stripe, AWS, CI/CD

- Built the React/TypeScript front end from zero and owned its architecture for 3 years: 100k+ users, adopted by leading Web3 companies
- Contributed to Node.js backend tasks supporting product features, including API integrations, business logic, and real-time Socket.IO flows
- Integrated LLM-powered candidate matching, smart search, and profile parsing with backend and OpenAI APIs
- Designed UX for AI features with streaming responses: incremental rendering, loading and progress states, and graceful fallbacks for model latency and errors
- Delivered real-time features with resilient loading, error, and reconnection handling across client-server flows
- Built internal dashboards and admin tools for platform operations, user management, and Stripe payment workflows
- Set up product analytics event tracking in Mixpanel; used funnel/engagement data to validate feature changes, including the AI search rebuild
- Improved application performance by ~35% through code splitting, lazy loading, and optimised real-time updates
- Set up and maintained CI/CD pipelines and AWS deployments, improving release reliability
- Designed scalable component architecture using shadcn/Radix to support rapid feature development

Avenga · London, UK (Remote)

Jul 2022 - Jun 2023

Software Engineer · Insurance Technology Portal

Stack: React, TypeScript, REST APIs, Contentful, Auth0, AWS, CI/CD

- Defined API contracts and aligned frontend-backend interactions for efficient data indexing and search accuracy
- Integrated 5+ third-party data sources to enrich search results and improve displayed information
- Built a scalable faceted search system that cut time-to-find by ~30%
- Reduced initial load time by ~25-35% and response times by ~20% through lazy loading and bundle optimisation
- Delivered responsive, mobile-first UI with secure Auth0-based access flows

Perfectial · USA (Remote)

Mar 2021 - Jul 2022

Software Engineer · Crypto & Payment Infrastructure

Stack: React, Redux, TypeScript, web3, Solidity, REST APIs, Jest

- Integrated payment providers, REST APIs, wallets, and blockchain interactions, reducing processing errors by ~20%
- Built a crypto payments dashboard for managing transactions, wallets, and payment flows
- Architected reliable state management for high-frequency transaction data and asynchronous operations
- Optimised application performance under high load, reducing UI latency by ~30% during peak periods

StarApps · UK · USA (Remote)

Oct 2019 - Feb 2021

Front End Developer · Corporate Management App & Online Store

Stack: Node.js, JavaScript, React, REST APIs, MongoDB, SASS

- Built and maintained Node.js REST APIs, business logic, and MongoDB data integrations for HR and eCommerce modules
- Developed core HR features for leave, timesheets, attendance, and reporting used by internal teams
- Built product listings, cart, checkout, and related API integrations that lifted conversion by ~15%
- Resolved production issues, improved performance by ~25%, and developed reusable UI components

FREELANCE & SIDE PROJECTS

Fintech IQ (freelance) - Seven-page Next.js site for a Swiss-regulated digital asset intermediary: services, settlement process, and compliance explained with product-style UI visuals

AI Chat Assistant - React and TypeScript chat connected to the OpenAI API with streaming responses, conversation state, and resilient error handling

Browser Extension - End-to-end Chrome extension with injected UI, a background service worker, cross-context messaging, and persistent state

TECHNICAL SKILLS

Core	TypeScript, JavaScript, React.js, Next.js, Node.js, Git, Webpack, Vite
Backend	Node.js, REST APIs, MongoDB, GraphQL, Apollo, Socket.IO, API integrations, business logic
AI / LLM	OpenAI API integration, streaming UX, prompt engineering · Claude Code, Codex, GitHub Copilot, ChatGPT
Frontend	Redux, React Hooks, HTML, CSS, SASS, Tailwind, Material-UI, Ant Design, shadcn, Radix
Cloud	AWS, Docker, CI/CD, GitHub Actions, production deployments
Testing	Jest, React Testing Library, Cypress, Playwright
Other	Stripe, Auth0, Contentful, Mixpanel, technical SEO, web3, Solidity

EDUCATION

Vynnychenko Central Ukrainian State University
Master's degree

LANGUAGES

Ukrainian - Native or Bilingual
English - B2 (Upper-Intermediate)
